## Bridge course in Biochemistry (2017-18)

### SYLLABUS

**V. G. Shivdare College of Arts, Commerce and Science, Solapur**

#### Bridge Course in Biochemistry

##### INTRODUCTION:

Biochemistry is not taught as a separate subject in higher secondary schools. Some concepts in biochemistry are covered in biology or even in chemistry courses. Moreover, higher secondary school teachers have not normally been exposed to biochemistry since their own graduation; consequently, they are out of touch with the present state of this discipline. As a result, secondary school students frequently do not appreciate the importance of biochemistry in many aspects of our lives such as health, agriculture, the environment, etc.

To bridge the gap between secondary education and the biochemistry in Biotechnology degree course, the Department of Biotechnology of V. G. Shivdare College of Arts, Commerce and Science, Solapur has designed a course with lectures for students at the beginning of B.Sc. Biotechnology Part-I Semester-II. The promotion of biochemistry among young people is crucial if we are to increase their interest in these disciplines.

##### OBJECTIVES

- 01) To bridge the gap between the concept of Biochemistry at UG level and Higher Secondary School level
- 02) To impart minimum basic knowledge in Biochemistry to UG students.
- 03) To bring such students on par and equivalence with each other.
- 04) To strengthen the base of such students in basic of Biochemistry.
- 05) To train such students to become good learner in biochemistry.

##### THE COURSE

The course includes series total of 10 lectures followed by evaluation through written exam at the end of course. The lectures are made up of 40 min of theory plus 10 min of questions. The topics covered are as follows.

- Concept of basic chemistry (Atoms, bonds, molecules).
- Carbon as backbone of biomolecules.
- Water as a reactant.
- The fitness of the aqueous environment for living organisms.
- Concept of isomerization (Geometric isomers, structural isomers, epimers, optical isomers)
- Concept of molarity, normality, molality, percent solutions.
- Concept of acid, base and buffer.
- Macronutrients, micronutrients, vitamins type and their role.
- Concept of metabolism, anabolism, and catabolism.

##### EVALUATION

The evaluation is to get idea about how much of content students gets captured and to cross check whether teaching learning is effective. At the end of course there will be an evaluation through written exam. The scheme of examination will be as below

|                                    |          |
|------------------------------------|----------|
| Q.1) 10 MCQ                        | 10 Marks |
